Garden Guide and Map

Welcome to the Garden Classroom

Below are some ideas to get you exploring.
Use the map on the back to help you.

Can you find:

The Human Sundial. Use your shadow to tell the time.

The Weather Station. Open it up and record the weather.

The Zoo Garden. Try to guess why some of these plants have animal names.

The Honey Bees. Open the observational hive and flip through the bee book to learn about these helpful insects.

The Root View Box. Read about roots and then take a peek.

Fruit Trees. We have over 20 types of fruit trees in the Garden Classroom. Can you find five of them?

The Pizza Bed. Can you find all the ingredients to make a pepperoni pizza growing in this garden bed?

Tree O' Tunes. Go make some music!

Go to the Rot Zone

Find the Squirm Inn. Take a peek inside and see what it's like to be a worm.

Find the compost thermometer and see if any of the compost piles are heating up.

Visit the hens and read their stories. Can you guess which story is true?

Find the Rot Zone Signs. Read to learn about making compost at home.

Please return this garden guide to the information box when you are done. Thank you.
